TRACTICS SAGE

Adds Up to a Smarter Way to Manage Your Heavy Civil Projects.

A Winning Combo for Heavy Contractors

Tractics has joined forces with Sage, uniting Tractics' expertise in field, fleet, and project operations, with Sage's industry-leading solution for construction accounting. Together, they provide the heavy civil market with a data-rich, cloud-native platform to seamlessly manage their entire business from the field to the office.

TRACTICS + SAGE

TRACTICS

Why Tractics + Sage?

With this cloud-based integration, you're not just investing in tools—you're building a smarter, more profitable business.

- **Connected Teams**
Ensure everyone from the field to the office is on the same page.
- **Confident Decisions**
Trust you are working with accurate, real-time data to guide every choice.
- **Streamlined Processes**
Save time, reduce errors, and improve outcomes with seamless operations and financial workflows.

“The integration of Sage Intacct with Tractics is a game-changer for heavy civil contractors. Our collaboration ensures they have the real-time insights and financial control needed to manage complex projects efficiently, from the ground up.”

Julie Adams | SVP CONSTRUCTION
AND REAL ESTATE, SAGE

THE BEST OF BOTH WORLDS

Take Control of Your Project Operations and Business Finances

Real-Time Visibility

Keep crew, foremen, and office aligned with real-time updates on timesheets, project progress, and financial performance.

Simplified Accounting

Centralize and automate complex financial processes like WIP tracking, AIA billing, and payroll with Sage's powerful tools.

Smarter, Data-Driven Decisions

Make informed calls with integrated reporting and analytics that pull data from both platforms, ensuring accuracy and confidence in every decision.

Improved Profitability

Track every dollar—labor, materials, equipment, and more—against budgets in real time, maximizing job profitability and minimizing guesswork.

TRACTICS

THE RIGHT TOOLS FOR THE JOB

From the Field to the Office,
Manage It All with Ease

Empower Foremen and Crews

- Foremen manage projects with clear visibility into hours, resources, and goals.
- Crews get clock-in/out reminders in geo-fenced areas for accurate time tracking.

Streamline Job Sites

- Use the Tractics app to capture job site data, photos, and notes in one place.
- Manage fleet operations with telematics for real-time updates on equipment status, driver safety, and efficiency metrics.

Optimize Equipment Usage

- Prevent downtime with beacon tracking for precise equipment locations.
- Track usage to save time and money while avoiding unnecessary costs.

SAGE

UNRIVALED FINANCIAL MANAGEMENT

Built for Construction, Scaled
for Your Business

Unmatched Flexibility

Organize financials by project, job type, or location with a dimensional general ledger. Manage multi-entity operations, inter-company transactions, and compliance with ease.

Audit-Ready Reporting

Satisfy auditors, bonding companies, and stakeholders with timely and detailed financial insights.

Comprehensive Automation

- Automate WIP management to keep cash flow steady.
- Handle asset management from acquisition to disposal effortlessly.

On-Demand Insights

Access dashboards with one-click drill-downs into the data you need. Review trends, compare performance, and improve future outcomes with unparalleled ease.

Dimensional Accounting

Enable real-time reporting and produce up-to-the-minute financials with Sage Intacct Dimensions.

“This partnership brings together two industry leaders to provide heavy civil contractors with the best tools for success. By integrating Tractics’ operational expertise with Sage’s financial mastery, we’re empowering contractors to work smarter, streamline processes, and make data-driven decisions that drive profitability.”
